

23-Nov-09

Data on reported catch of walrus in Greenland (1993-2008) received on 21 October 2009 in e-mail from the Department of Fisheries, Hunting and Agriculture (Greenland Government, Nuuk).

According to the source all data during 1993-2004 have been checked, and during 2005-2008 the data in the reporting system "Piniarneq" have been cross-checked with data in the special reporting forms that are to be filled in each case of a walrus catch. This was done by phoning to the individual hunters. Furthermore, 1 walrus in total was reported as struck and lost (Ibid.)

EW Born rearranged catches reported for 1993-1997 (lower table) so that the geographical areas are consistent with the data 1998-2008).

All entries made by Born are in red.
