

09:00-09:20: Introduction

[09:20-10:15: Theme 1](#)

André Moust: Dynamics of marine mammals in Norwegian fisheries – monitoring, quantification and mitigation

Sandra Nédre Engbe: Infectious agents in Antarctic pinnipeds

Solveig Eidegaard: Contaminants in North Atlantic marine mammals – a review

10:15-10:30: Coffee break

[10:30-11:25: Welfare/Other](#)

Albert Puhoskio-Gunnarsson: Unmanned Aerial Vehicle (UAV) applications in polar marine predator ecology

Olaf Ringtved: Ringed seal (*Pusa hispida*) diet in western Spitzbergen – an ecosystem in change

Sanna Sæviik: Reporting on hunting methods: a review of welfare assessment parameters in marine and terrestrial species

11:25-11:30: Break

[11:30-12:00: Law of the Sea](#)

Filip Davina Farman Vel Krul: Legal framework of whale protection in the Arctic

Daniela Tomas: Scientific Research and Whales: conflicting conceptions in International Law under the spectrum of the ICJ Whaling Case

Audis Raygun: Underwater Noise and the Pursuit of International Law

12:00-11:00: Break

[13:00-14:10: Physiology](#)

Aleksander Mjelle: Development of diving capacity and behaviour in harp seal (*Phoca groenlandica*) neonlings from the Greenland Sea Stock

Judith Uhlmann: The respiratory physiology of the harp seal (*Phoca groenlandica*), a master's project at UIT

Chiara Chiaren: Brain capillarization in diving species

14:10-14:30: Coffee break

[14:30-17:30: Movement/abundance/PSA](#)

Elin Kettner: Understanding the migratory behaviour of humpback whales in the eastern North Atlantic

Evert Mull: Overlap between whale movement and human activities in Norwegian waters

Osanna Lønnard: Trends in abundance of large whales in Norwegian and adjacent waters based on shipboard line-transect surveys between 1995-2018

[18:30-19:00: Activity for student presenters](#)
