

Overview of work load through the years for the Scientific Committee versus the Committee for Hunting Methods, Committee for Inspection and Observation and the Working Group on By-catch, Entanglements and Live Strandings (BYCELS).

(prepared by Solveig Enoksen, intern, and Geneviève Desportes)

The workload associated to the committees is expressed considering both the committees and their subsidiary bodies (WG, EG, WS, symposia) in four different ways, as the number of related meetings, number of meeting hours, length of reports and number of participants.

Three different charts have been made to visualise the evolution of the work load connected to the the Scientific Committee and the Committees for Hunting Methods and Inspection and Observation and BYCELS. Trendlines (Excel) have been added on the figures for information.

Figure 1 illustrates the annual number of committee meetings, workshops, working group meetings, expert group meetings, symposia and so on, as well as the hours spent. The numbers for the Scientific Committee are presented by themselves, while the numbers for the others (the Committees for Hunting Methods and Inspection and Observation and BYCELS) are pooled together. For meetings/workshops, 8 hours per meeting day were assumed when no precise time was specified. For 2018, the scheduled days of meetings were used for upcoming meetings. BYCELS have only had one meeting thus far, in 2018.

Figure 2 illustrates the number of report pages produced annually in relation to the work of the Scientific Committee and the Committees for Hunting Methods and Inspection and Observation, with the two latter ones pooled together. The years 2007 and 2008 were pooled, to follow the Annual Report. 2018 is not included, as not all meetings have taken place yet.

Figure 3 illustrates the number of participants for all workshops, working groups, expert groups etc, for the Scientific Committee compared to the Committee for Hunting Methods. Committee meetings are not included here, as their number is predefined by the Rules of Procedures.

Figure 1: The number of hours for committee meetings, workshops, working group meetings, expert group meetings, symposia etc and the total number of these for each year. The numbers for the Committees for Hunting Methods and Inspection and Observation and BYCELS are pooled together into "other number".

Figure 2: The number of report pages written per year, for the Scientific Committee versus the pooled Committees for Hunting Methods and Inspection and Observations.

Figure 3: The number of participants for workshops, working groups, expert groups etc for the Scientific Committee and the Committee of Hunting Methods.
