Explanations
Estimated time given in months per year or hours per year

Committees, WG and Chair should reflect time spent preparing and participating in meetings including finalising the reports. Production of work (assessment, abundance estimates, preparation of catch data etc. ) is the responsibility of the members countries and should be included in the scientific work categorised under seals/ whales. paper to be reviewed at the meeting.

Seals and Whales should reflect time spent on marine mammal monitoring and research projects focusing on marine mammals that are a direct response to NAMMCO requests - i.e field work analysis,
