

## STRANDING RESPONSE NETWORK

### HOW TO REPORT, WHAT TO REPORT AND WHERE TO STORE THE STRANDING DATA

#### ORGANISATION

- Define relevant coordinating/leading authority (unit and contact person (Ministry/Directorate/Research Institute)) - where to call

It is recommended that the leader/coordinator is a veterinarian or experienced biologist who will be able to assess the situation in order to initiate relevant action (euthanasia, possible sampling, who should respond and to what)

- Identify coastal areas (management areas) and volunteer units within each area

Suggestions for volunteers: local ecological/ornithological/aquature/animal welfare organisations.

Member Countries to identify possible NGOs or intended persons to be volunteer in the network. Training courses should be arranged for the network of volunteers.

If sampling is required, suitable equipment should be stored at sites identified by the member countries.

#### HOW TO REPORT A STRANDING ALIVE OR DEAD FROM THE POINT OF VIEW OF THE PERSON FINDING THE ANIMAL(S)

To be widely distributed (local police station, NGO's local newspapers, radio stations, municipalities, tourist offices etc.,

Important to remember when approaching a **live stranded animal**

- Approach the animal safely and carefully. Keep away from the tail.
- People, dogs and wild animals should be kept at a distance.
- Do not move the animal by pulling on its fins or tail.
- Call coordinator who will ask for further information such as:

#### Stranding both alive and dead

- Location and date found
- Species and sex
- Overall length
- Condition of the animal
- Your contact details should further information be needed

Based on this information the Coordinator will decide on further action.

Live strandings: information will be forwarded to relevant task force (as a rule large whales will be euthanased if possible).

Dead strandings / after euthanasia: Sampling according to protocol relevant to the size of the animal or coordinator gives instructions about sampling and further processing of the samples (pathological investigations).
