3. REVIEW OF DATA 2021

[NAMMCO/Database-2021](#) contains the NAMMCO database up to and including 2021. The CHM related data are found under the cetaceans and pinnipeds sections- towards the right end of the sheet.

From the discussion last year:

Generally, the importance of including adequate, explanatory remarks where information may be misunderstood was emphasised. This was especially noted for the data on quota and carry over numbers given the existence of many different systems that are not self-explanatory. The member countries will forward text to this extent to the Secretariat for inclusion in the document.

Noting inconsistencies regarding management areas as defined by the NAMMCO SC and the ones used by the Directorate pertaining to pinnipeds Norway committed to follow this up with the SC.

The CHM should review the submitted data from members.

4. ACTIVE RECOMMENDATIONS AND FOLLOW UP

NAMMCO/CHM-recommendations contains the overview of all recommendations from EGM/WS to member countries and responses. NAMMCO/CHM-2022-01/02 contains a proposal for grouping of similar recommendations. The document was presented to the CHM at its last meeting, and the Secretariat was asked to shorten the document.

Follow up from members

5. VIDEO PROJECTS – ONGOING AND PROPOSALS

Screening of the information video in Norwegian on the safe handling of the whaling cannon with loader pusher shell, the harpoon and the Whale grenade 99. Information on plans for the English version.

A draft proposal for a 2nd information video on optimal target location and shooting angle in whale hunting will be presented at a designated meeting later in the spring.
