

STRANDING RESPONSE NETWORK

Presented to Council 28 (2021). Council concluded that the guidelines function as a point of reference for the Member Countries to apply when/it relevant.

BYCEIS developed these guidelines based on existing stranding response networks. BYCEIS reviewed existing protocols and guidelines on sampling of stranded animals and recommended that Member Countries use the most recent recognised protocol. Attention was drawn to the 2009 ASCOBANS report "Best practice on cetacean post-mortem investigations and tissue sampling".

HOW TO REPORT, WHAT TO REPORT AND WHERE TO STORE THE STRANDING DATA

- identify coastal areas (management areas) and volunteer units within each area

Suggestions for volunteers: local ecological/ornithological/fisheries/animal welfare organisations.

Member Countries to identify possible NGOs or interested persons to be volunteer in the network. Training courses should be arranged for the network of volunteers.

If sampling is required, suitable equipment should be stored at sites identified by the member countries.
