

Nunavut Tunngavik Inc.

Nunavut Tunngavik Inc and the Regional Wildlife Organization are here as observers. We represent Inuit of Nunavut. Nunavut has the longest coastline in Canada. Inuit depend on marine mammals for subsistence hunting. We are also being affected with climate change, we are seeing more killer whales as the ice recedes. We are happy to be here, and we have learned what other countries how their hunting methods are useful. I wish you all a good meeting this week and we will learn from this meeting.
